A: Thanks to @gmichaels3 for giving me the key. I found this link and found a zip file with an installer file in it. When I ran the installer file it gave me a popup with "Install autocad 2010 for free". I had no idea I could use my Autodesk Account to get autocad but it is, so great! The present invention relates to a dispensing cup for liquids, and more particularly to a stackable cup having two separate compartments, one for holding a first portion of a liquid, and a second compartment for holding a second portion of the liquid. Many of the existing dispensing cups are not stackable. U.S. Pat. No. 5,458,031 describes a cup having a liquid receptacle and a foam pad for holding the receptacle in the cup. U.S. Pat. No. 6,425,566 discloses a cup having a liquid receptacle and a foam cover. U.S. Pat. No. 6,722,628 discloses a stackable cup having a handle and a cup body. Other cups are stackable but are cumbersome to use. U.S. Pat. No. 5,570,756 discloses a stackable cup having a shape that maintains the liquid and prevents spillage of the liquid in the event the cup is knocked over. U.S. Pat. No. 5,901,420 discloses a stackable cup having a slidable cup body. Thus, a stackable cup solving the aforementioned problems is desired. Rodents and insects are common vermin within an agricultural area. Typically, agricultural activities such as mowing and insecticide application are carried out with a tractor drawn machine having a mowing or insecticide application device which passes over the affected area. A laterally extending boom mounted on the front end of the machine can be mounted so as to be placed into contact with the ground to carry out the desired treatment. A number of problems are associated with such equipment.

New AutoCAD tools: Fluid properties (arc, text, and polar) can now automatically adapt to their AutoCAD location. Use drag and drop, and you can even flip them! (video: 1:32 min.) CNC tools (wireframe and feature): Load or export your own.STL files. Redesigned API: The AutoCAD API was upgraded to version 1.3.4.0. This version introduced a number of features and improvements: – New and upgraded toolset: – New and upgraded features: – New and upgraded functionality: Migrate to AutoLISP: Because of the improvements to the AutoLISP programming language, version 2020.2, we will be retiring the AutoLISP compiler in a future release. Use the AutoLISP compiler that comes with the new AutoCAD 2020 or AutoCAD 21. For details, see the documentation. Graphical operating system: We've released an upgraded version of the operating system that runs on the Windows operating system. This upgrade improves the look and feel of the AutoCAD application, improves performance and stability, and extends the application to run on more platforms. Our new operating system is called Windows AutoCAD: Improvements to the Application: We've made numerous improvements to the application and the graphical user interface. The new Office theme includes a number of new standard colors, and each tool has a unique look and feel. In addition, the look and feel of tool controls was improved to make the design process more intuitive. Include your company logo: You can now choose the color of the button that opens the company name and logo from the Options dialog box. This button is automatically shown whenever the current AutoCAD session is connected to an enterprise server. User interface and appearance: There are several improvements to the AutoCAD user interface. For instance, text labels have been redesigned to use flat fonts and to fit better with the Windows 8 style. In addition, the AutoCAD look and feel will be updated to fit Windows 10. Actions: Many of the commonly used actions have been improved. For instance, the actions for the linetype, block, and spline toolboxes have been improved to create a more stable application. There are
